## EXCURSIONS

### *Mantova & Parco del Mincio*

The aim of the Sunday excursion is to visit a natural water environment on the River Mincio, Lake Garda's main outlet.

At Mantua, the Mincio was widened in the late 12th century, forming a series of 'lakes' which skirt the edges of the old city. The original settlement here, dating from about 2000 BC, was on an island in the Mincio.

### *Beyond the tap*

The aim of the guided excursions to Sirmione and Rovato is to raise awareness of the importance of water in our daily routines and what is being done to provide public water in every household.

### *Conference*

Acque Bresciane  
Sustainable use water resources
